Annual Wellness Testing allows our doctors to identify conditions and diseases in your pet before signs may be evident. Additionally, screening tests provide information on what’s “normal” for your pet, and allows your doctor to quickly evaluate changes in his or her biology.

WHY TEST ANNUALLY?

Pets age roughly 5-7 times faster than humans. It's vital to test every year to screen for diseases and conditions.

IS IT EXPENSIVE?

Our annual wellness bundles are extremely affordable and discounted. We are working with an outside laboratory to keep testing packages inexpensive. Speak with a team member to learn more.

HOW WILL IT SAVE ME MONEY?

By testing, your doctor will be able to identify critical patterns in your pet’s biological make-up. Ultimately, early detection will enable an accurate diagnosis more quickly, potentially saving you thousands of dollars in tests and critical care.

HOW CAN IT SAVE MY PET’S LIFE?

Your doctor will be able to spot signs of kidney disease, liver failure, diabetes and much more — long before there are any symptoms. With early (pre-symptom) disease treatment, your pet could live a longer, healthier life.

PET HEALTH DIAGNOSTIC GROUPS

| LIFE STAGES | TEST COMPONENTS |
|--|---|
|  Young Adult Dogs | Chemistry Panel with Complete Blood Count (CBC) |
|  Middle Age Dogs | Chemistry Panel with Complete Blood Count (CBC) & Basic Thyroid Monitoring |
|  Senior Dogs | Chemistry Panel with Complete Blood Count (CBC), Basic Thyroid Monitoring, Urinalysis |
|  Young Adult Cats | Chemistry Panel with Complete Blood Count (CBC) |
|  Middle Age Cats | Chemistry Panel with Complete Blood Count (CBC) & Basic Thyroid Monitoring |
|  Senior Cats | Chemistry Panel with Complete Blood Count (CBC), Basic Thyroid Monitoring, Urinalysis |

OTHER RECOMMENDED DIAGNOSTICS THAT CAN BE COMBINED FOR DISCOUNTS

**Fecal samples are recommended at all age levels*

***4DX Heartworm blood test is recommended for dogs of all age levels (this one sample tests for Heartworm, Lyme, Ehrlichiosis, Anaplasmosis)*
